

FREE TB TESTING FOR CHILDREN

A new program to promote rapid & accurate diagnosis using GeneXpert - an innovative molecular test

HELP YOUR CHILD THRIVE!

If your child has TB symptoms...

- Cough for more than two weeks
- Fever, night sweats
- Weight loss or failure to thrive
- Feelings of sickness, weakness or lethargy
- Swelling, pain or discharge from lymph glands
- TB in family or contact

they deserve a diagnosis

Fast testing by GeneXpert - how does it work?

- Test results are reported to providers within 24 hours via SMS & email
- Standard rate transportation costs are covered by the programme & paid upon receipt of samples
- All sample types – from pulmonary & extra pulmonary sources – can be tested

Ask your doctor or contact us for more details
