

10-Color Multiplexing Technology

GeneXpert® System* Upgrade Options for HBDC Customers

Choose one of these upgrade options:

1 Order a new GeneXpert system with 10-color technology

Consider this option when you would like to increase capacity or are planning to renew your installed GeneXpert system to be ready for Xpert® MTB/XDR* and future releases of Xpert tests with 10-color technology including MTB/RIF/INH*.

Includes:

WIN10 computer, barcode scanner, latest GeneXpert software, and all accessories

- Remote installation included and onsite installation available by request[#]
- This new GeneXpert system with 10-color technology could also be connected to an existing GeneXpert system and replace an old computer. If that's the case, make sure to add a separate DAISYKIT part to your new system order

2 Daisy chain a new GeneXpert system to your existing GeneXpert system

A GeneXpert daisy chain accessory kit (DAISYKIT) is required to daisy chain your existing GeneXpert system to a new GeneXpert system with 10-color technology. Consider this option if you want to keep using your existing GeneXpert system with 6-color technology but would like additional capacity for Xpert tests with 10-color technology testing capabilities including Xpert MTB/XDR*.

Required (needs to be ordered separately):

DAISYKIT (\$75) and one software kit Dx 6.2 or higher per site for Xpert MTB/XDR testing. Please add to your order the number of Software kits needed for daisy chaining your new add-on instruments for Xpert MTB/XDR testing.

- Remote installation included and onsite installation available by request[#]

Computer check:

- Computers running WINXP operating systems must be replaced with a new WIN10 computer
- Cepheid recommends replacing computers running WIN7 with new WIN10 computers, due to Microsoft's discontinuation of WIN7 support in 2021

Power Supply Check:

- Check if the additional add-on GeneXpert instrument is supported by the existing power supply

Ordering Information:

Catalog Number(s)	Description	Price
New GeneXpert® Systems* with Desktop		
GXII-1-D-10C	GeneXpert II R2, 1-Module, Desktop, 10-color	\$9,420
